PROFILE

Full stack web developer with a mid seniority, proficient in a range of technologies including **HTML, CSS, JavaScript, ReactJs, Nodejs, TypeScript, NextJS, and Laravel**. With a strong foundation in web development, I enjoy bringing design concepts to life through elegant and functional code. My passion for learning and eagerness to take on new challenges have enabled me to deliver high-quality solutions for clients across a variety of industries.

EXPERIENCE

Software Engineer

Argano Connect | Jul 2022 - Feb 2024

As a **Junior software engineer** at ArganoConnect, i collaborate with a team of developers, project managers, tech leaders, QA testers, and designers to work on a variety of different projects. My role involves using my expertise in technologies such as **React JS, Node JS, WordPress PHP, HTML, CSS, and JavaScript** to create innovative and effective solutions for our clients. Depending on the specific needs of each project, i work with a team to decide which technologies are most suitable for the job.

- Team work
- Understand the client's requirements, designing and developing software solutions.
- Testing & Debugging code to ensure high-quality deliverables
- SCRUM

Software Developer

Voy En Bici | Jul 2023 - Dec 2023

On my free time i collaborate as a pro bono developer with a team of designers and developers, to develop a modern website for an ONG named **Voy En Bici**. At this project we use a range of tecnologies such as **ReactJs, TailwindCss, HTML**. My commitment contributes to creating a positive impact and empowers individuals to build a brighter future.

Freelance Developer | 2021 - Current Position

As a freelance developer, I have had the privilege of working with a diverse range of clients and projects, honing my skills and delivering exceptional results. My experience in crafting dynamic web solutions spans several years, during which I have developed expertise in both front-end and back-end technologies. I specialize in creating responsive landing pages and full-stack web applications that meet the unique requirements of businesses and individuals.

Software Engineer

Global Tec Trade | Jun 2021 - Dec 2021

As the sole developer for a start-up, my primary responsibility was to design and develop a CRM system using various technologies such as **Laravel, Bootstrap, HTML, CSS, JavaScript, JQuery, and MySQL**. This entailed making key technical decisions, as i was in charge of most of the technical aspects of the project. My role would have also involved collaborating with other teams or stakeholders to understand their requirements and translating them into the final product. Additionally, i would have been responsible for testing and troubleshooting the system to ensure its reliability and functionality.

CERTIFICATIONS
